

Stompbox Converter

The Stompbox Converter can be connected between any stompbox (e.g. Shadow, Ortega, Meinl, Logjam Logarhythm) and any amplifier using a standard jack cable. The Stompbox Converter offers 12 different sample sounds for direct selection by means of a rotary control, the sensitivity can be adjusted to the stompbox used by means of a second control. The unit is powered by an external power supply.

The sounds

- Pickup Stompbox
- Microphone Stompbox - Cajon Bass
- Bass Drum 1
- Bass Drum 2
- Bass Drum 3
- Snare
- Hi Hat
- Cowbell
- Tambourine
- cabasa
